Ophthalmology is a medical specialty dealing with the study and treatment of anatomy, function and diseases of the eye. The study elaborates the surgical treatment of eye disorders ensures the care and prevention of blindness.

Journal of Clinical and Experimental Ophthalmology is a peer-reviewed ophthalmic journal; international in its scope not only renders ophthalmic studies and research advancements in surgical treatments but also focuses the practical problems as case reports on etiology of eye diseases, diagnostic techniques, complications and their risks involved during surgery. The Journal of Clinical and Experimental Ophthalmology under Open Access Category aims to update the information on new trends and advances within ophthalmology which stands as an interest to all eye-care practitioners and researchers.

Journal of Clinical and Experimental Ophthalmology encompasses all subspecialties within ophthalmic studies which includes clinical research inventions and advanced technological methods. The Journal of Clinical and Experimental Ophthalmology publishes original research articles covering all aspects of clinical practice observations, clinical research into experimental practice, and clinically relevant experimental studies in all areas of ophthalmology. The information provided in the journal is reliable and is freely accessible through net globally to share the innovations and advancements of researchers and ophthalmologists.

Journal of Clinical & Experimental Ophthalmology - Open Access uses online manuscript submission, review and tracking systems for quality and quick review processing. Submit your manuscript at
